- Experience with web infrastructure and distributed systems

What we offer

- Flexible hours
- The ability to work part-time or full-time

About Us

NorthQ ApS is a Danish technology company, specialized in Internet of Things with a main focus on manufacturing and developing home automation and energy optimization solutions. Founded in 2007 by a small group of highly motivated and creative people, the company is the pioneer within retrofit meter reading solutions for electricity, gas and water meters.

Currently our solutions are used by major utilities like Dong Energy, SEAS-Nve, E.ON, Fortum and many others utilities, Telco's and OEMs. While developing the hardware and software of our products, we are guided by the belief that technology should be simple and robust. Moreover, it should be easy to install, easy to operate, without the need of much attention.

If you are interested in this position please send us your CV and Cover Letter to ***hr@northq.com***.
